

Dr. Andrew P. Paplinski

Associate Professor in the Clayton School of Information Technology Monash University

Biography :

Andrew P. Paplinski received his M.Eng and Ph.D. degrees from the Faculty of Electronic Engineering, Warsaw University of Technology, Poland.

After moving to Australia, Andrew worked at the Department of Computer Science, Australian National University in Canberra, the Department of Electrical and Electronic Engineering, University of Adelaide, and finally at School of IT at Monash University where he is Associate Professor.

Since 2012 Andrew has been teaching in the newly formed Southeast University-Monash University Joint Graduate School in Suzhou, China

Andrew visited and collaborated with Kings College London, University of Oregon, University of New Mexico, University of Illinois at Urbana-Champaign, Nanyang Technological University, Technical University of Denmark and Lulea Technological University, Sweden..

His research activities evolved from designing computer hardware, through theory of control systems, signal and image processing, ultrasonic imaging into current involvement in computer vision and computational neuroscience and intelligence.

Andrew has published over 100 papers, book chapters and books. His h-index is 10 and g-index 27.

Andrew serves as an assessor for the Australian Research Council and a variety of Europeans research authorities.

He also acts as a reviewer for numerous conferences and journals from the area of computer vision and computational intelligence.

14 PhD students graduated under his supervision.
