

2013 Philips Product Innovation Forum: Innovation Topics

The list below indicates some specific challenges Philips is striving to overcome and we welcome your collaboration on these challenges

CONSUMER LIFESTYLE RELATED INNOVATION TOPICS

- *Innovations that help to make meals healthier, tastier, or easier to prepare*
- *Innovations that help to clean and filter the polluted air to improve air quality*
- *Technology, material, algorithm, chemical or device-based innovations that style hair without using (excessive) heat*
- *Technology or device-based innovations that contribute to healthy, fresh, radiant and youthful-looking skin*
- *Technology or device-based innovations, or accessories for personal health monitoring and management.*

HEALTHCARE RELATED INNOVATION TOPICS

- *Innovative solutions or technologies for medical imaging diagnostics and therapy which features:*
 - *Affordable pricing*
 - *Simplified process*
 - *Comfortable user experience*
 - *Portable etc.*
- *Innovations that will modernize health information exchange and follow the trend in network connectivity and integration*
- *Innovations that help to detect chronic health problems early and monitor health conditions at home*
- *Innovations that help to diagnose or treat sleep and respiratory disorders*

LIGHTING RELATED INNOVATION TOPICS

- *Cost breakthrough on LED Lamps and luminaires;*
 - *New lamp/luminaire architectures*
 - *Novel optical solutions & new heat sink design and materials*

- *Intelligent lighting solutions:*
 - *Cost effective LED light sources with embedded intelligence*
 - *Sensing technologies for intelligent lighting solutions*
 - *Innovative user interactions*

- *Lighting applications and new concepts*
 - *New lighting systems concepts*
 - *New concepts on embedded LED lighting*
 - *New applications of LED light*

- *Next generation light source technologies*

OTHER ADJACENCIES

- *Innovations that can help people live healthier, more enjoyable lives.*
