

Q & A

- In this slide,
I will collect the questions you may want to know and my answers.

Q1: How will the lectures be given?

- A:

The lectures will mostly be pre-recorded as videos.

You read the course material at home and use the video recordings as references to the course content.

You can decide if you want to come to class to do the HWs.

Q2: Do I have to go to classroom during lecture time?

■ A:

It's not required.

However, you are welcome to come and work on the HW problems.
Feel free to stay as long as you like. (no later than 8:20pm, though)

Q3: Do you record course attendance?

- A: No, I don't do roll calls.

Q4: Do I need to use English in class?

■ A:

I have to use English for lectures.

When you have questions,
you are welcome to use the language you prefer.

So, the answer is no. You don't need to use English.

Q5: Can you improve your handwriting, or use typesetting instead?

- A:

Sometimes handwriting is better than typesetting, especially for math content. (For proving the lemmas and the theorems, blackboards are certainly better than the slides.)

You're highly welcome to help reproduce the content written on the jamboard if you're interested.

(Let me know if you want to do this.)
